COVID-19 TESTING AND EARLY TREATMENT

Updated 12/2021

The COVID-19 vaccines are the best protection against hospitalization and death due to COVID-19.

COVID-19 TESTING can help identify COVID-19 infection early and help you prevent others from getting infected.

- If you experience any COVID-19-like symptoms, immediately isolate and get tested to see if you are positive with COVID-19.

- At-home rapid tests with step-by-step instructions are now available for you to purchase at the nearest pharmacy.

- You can also contact your closest outreach worker, migrant clinic or provider for a test.

Remember - get tested as soon as you experience any COVID-19-like symptoms to be able to access early treatment!

EARLY TREATMENT

- By identifying a COVID-19 infection early, you can receive treatments that will significantly decrease your risk of needing to be hospitalized or dying from COVID-19.

- These highly effective treatments for COVID-19 must be given early, within the first 3-5 days of symptoms.

- If you test positive for COVID-19, call your nearest migrant clinic and ask how you can receive treatment.
